

CertiFile Domestic Credential Verification and Delivery Service

CollegeNET's CertiFile® Service Now Includes Domestic Credentials

Applying to your school just got easier! With CertiFile transcript verification and delivery, students order copies of each transcript just once, no matter how many applications they submit. You receive officially verified documents securely delivered to your institution and automatically collated to your admission application.

Complete, Convenient, and Secure

CertiFile provides schools complete, authenticated academic records and other documents for domestic applicants as well as international applicants who have studied in the U.S. This service allows your applicants to initiate electronic delivery of their documents directly through your *ApplyWeb*® application or their status page.

Your Admissions Office Receives Information You Can Trust

All academic transcripts, credentials and documents are officially verified by **Educational Perspectives**, a trusted, non-profit public service organization and NACES member, providing official credential authentication.

Students Pay Just Once for Unlimited Access

Once a student orders official documents, they're stored securely in an online wallet. Students can access their wallet anytime to collate and send their documents as many times as needed, without any additional charge.

You Enjoy Greater Efficiency and Accuracy

Verified documents are automatically imported into your Admit application evaluation system and matched with the corresponding application form. There's no manual data entry or collating. Documents may also be batched as individual PDF files and delivered electronically to your school for importing into your SIS or imaging systems.

You Specify Your Applicants' Access to This Feature

Each admissions office may add the document request feature within their application, or limit ordering to the application status page.
